AnyDesk

What is AnyDesk?

- **AnyDesk is a quick, safe, and easy-to-use tool** that lets you connect and to control computers from anywhere. It's like having access to your computer even when you're not physically there.

History

1

Emphasis on Speed and Security

AnyDesk was developed to provide a remote desktop software solution that emphasizes speed and security.

2

Need for Faster, More Secure Solution

The need for a faster, more secure, and more reliable remote desktop solution drove the creation of AnyDesk.

3

Company Founding and Establishment

AnyDesk Software GmbH was founded in 2014 and the company was established in Stuttgart, Germany. Anydesk is currently managed by the company based in Florida.

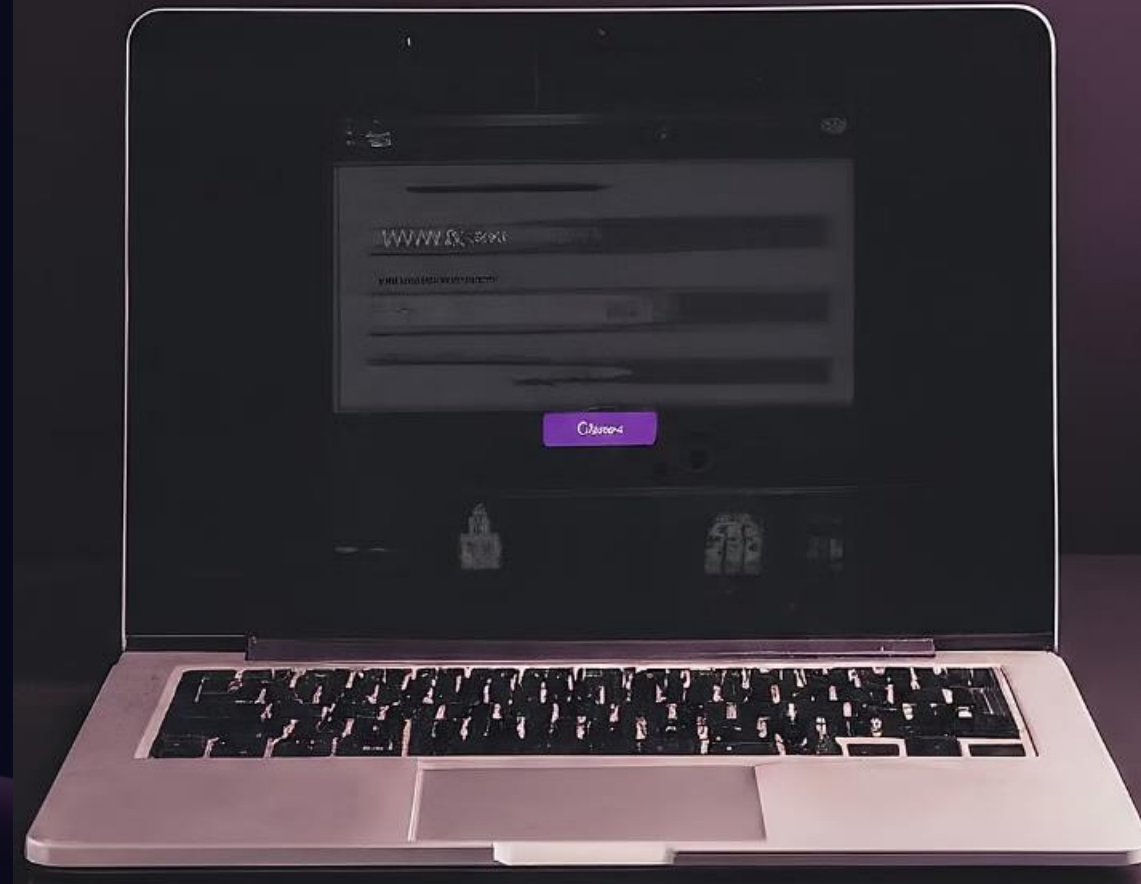

Download and Setup

- You can download AnyDesk from the following link:

<https://anydesk.com/en>

After installation, you can start using it with your remote desktop address or simply by typing another device's address without disclosing your personal credentials such as your email or phone number, thereby increasing user privacy protection.

Why Choose AnyDesk over Other?

AnyDesk

- For almost all operating systems
- Lightweight application
- Free for personal use
- Uncomplicated interface, easy to navigate
- Requires no account
- Strong encryption and various security features for secure connections even in free version

TeamViewer

- Requires more system resources, affecting performance
- Limited number of free connections in a certain timeframe even in personal use
- Complicated interface
- Requires subscription for security features

Microsoft Remote Desktop

- For Windows only
- Network configuration requirements making it difficult to connect
- Feature set is heavily complicated making hard to locate
- Requires Windows account credentials for security
