Skills

- Microsoft Asure
- PhpMyAdmin
- GitHub
- PhpStorm

- Adobe XD
- Office 365
- Agile Management
- VS Code

Profile of Skills

- Demonstrated Showcased expertise in multiple programming languages such as **C#**, **PHP** and **JavaScript**, essential for both backend and frontend web development tasks. This includes a strong foundation in **HTML5** and **CSS** for designing and implementing responsive, accessible user interfaces.
- Proficient in employing **Bootstrap** for crafting responsive layouts, **Laravel** for advanced PHP backend solutions, and MVC architecture to develop scalable and organized C# applications. This skill set is crucial for building web applications that are both structured and efficient
- Demonstrated ability to apply problem-solving strategies across various development frameworks, including Bootstrap, Laravel, **Angular**, and **MVC** for C#. This involves tackling unique framework-related challenges and utilizing each framework's distinctive features to devise effective solutions.

Professional Experience

Freelancer   December 2023 - Present

Convenience Store Website   January 2024 -Present

- Currently freelancing on my inaugural dynamic website project, tailored for a leading convenience store, incorporating Bootstrap, JavaScript, and a streamlined PHP backend to ensure a contemporary and responsive design.
- Scheduled to finalize the project by May, with the goal of boosting the convenience store's digital footprint and offering around-the-clock service through an intuitive interface.
- Expecting a 25% surge in customer engagement following the launch, highlighting my dedication to providing top-notch solutions on schedule and within budget through agile practices.

Key Projects

Full-Stack Web Application
Web Apps with PHP, St Clair College

- Actively working on a comprehensive web application for a course project, leveraging Laravel and MySQL to create a dynamic platform.

- This application is designed to feature an extensive collection of movies and web series, incorporating functionalities such as in-depth content descriptions, user ratings, cast details, and visual posters.
- Utilizing Laravel for its advanced data processing and retrieval features to ensure the site is accessible and optimally responsive on various devices.
- Applying Laravel's Eloquent ORM for sophisticated database management, aiming to boost the application's performance and scalability.
- Committed to finishing the project within a three-week period, showcasing my project management skills and the capability to develop a full-scale web application tailored for the entertainment industry.

Project Coordinator
Agile Management Project, St. Clair College

- Directed the creation and timely launch of a responsive web application for The Tutoring HUB™ within the allocated budget of $75,000.
- Managed a cross-functional team across seven critical stages: idea pitching, detailed documentation, budget management, design wireframing, sprint organization, backlog refinement, and analysis after launch.
- Developed an engaging pitch presentation and a comprehensive set of functional specifications that precisely matched the client's requirements.
- Exhibited strong financial stewardship by optimizing resource use and maintaining project profitability.
- Efficiently led a diverse team to meet stringent deadlines, securing an 82% score upon project unveiling and demonstrating effective project leadership, mastery of agile practices, and strategic execution.

Education

Diploma in Web Development and Internet Applications   January 2023 – Present

St. Clair College, Windsor, ON

Volunteering & Activities

- COVID-19 Response Initiative: Collaborated with peers during the pandemic to distribute complimentary ration kits and essential medical supplies, supporting healthcare workers in our community.
- Regularly dedicate weekends to volunteering at the local temple with my family, serving meals, and engaging in visits to orphanages and senior care facilities, reflecting a deep commitment to community welfare and support.
